PROFESSIONAL PROFILE

Aspiring Software Engineer with a deep focus on the MERN stack. Proven ability to bridge the gap between user requirements and technical implementation, evidenced by successful freelance project delivery. I am eager to apply my skills in API optimization, responsive UI design, and cloud deployment within a professional engineering team.

PROJECTS

FoodLoop

Jan 2026 - March 2026

Self-based, AI-assisted

Technologies: React.js, Node.js, Express.js, Mongo DB, Python, Leaflet Maps, Web Sockets, AWS Storage

- Engineered a multi-role MERN ecosystem with secure JWT authentication and role-based access control.
- Integrated Python microservices for AI-powered data validation to enhance backend processing efficiency.
- Implemented real-time logistics tracking using Socket.io and Leaflet for dynamic user interactions.
- Deployed scalable full-stack solutions on Vercel and Render, delivering clean-code applications.

TechHaven Ecommerce Web Application

May 2025 - June 2025

Self-based, AI-assisted

Technologies: React.js, Firebase Authentication, Tailwind CSS, JavaScript, Node.js, Mongo DB, Express.js

- Developing a full-stack ecommerce platform focused on laptops and PC components with features including user authentication, product catalog, and cart management.
- Implemented secure user authentication and session handling using Firebase Authentication.
- Built dynamic, responsive UI with React.js and Tailwind CSS, including advanced product filtering and real-time cart notifications.
- Implemented state management and cart functionality with real-time updates and toast notifications for enhanced user experience.

EDUCATION

St. Peter's College Colombo - 04

January 2010- January 2024

- Ordinary Level (O/L)
 - Completed with 8A B grades
- Advanced Level (A/L) – Mathematics Stream
 - Completed with A 2B grades

Sri Lanka Institute of Information Technology

February 2024 - Present

- BSc (Hons) in Information Technology Specializing in Information Technology

CERTIFICATIONS

- Error Makes Clever - Full Stack Development 3 Months Course

SKILLS

HTML | CSS | JS | React.js | Node.js | Express.js | Mongo DB | MS SQL Server | Python | Java | Spring Boot | Postman | AWS | Cloudfare

ACHIEVEMENTS

- Achieved a GPA of 3.83 in Year 1 Semester 1 and was recognized on the SLIIT Dean's List for academic excellence.
- Achieved a GPA of 4.0 in Year 1 Semester 2 and was recognized on the SLIIT Dean's List for academic excellence.
- Achieved a GPA of 3.85 in Year 2 Semester 1 and was recognized on the SLIIT Dean's List for academic excellence.

EXTRA-CURRICULAR ACTIVITY

2024 - 2025

Batch Representative

CLUB ACTIVITIES

- Web Developer | IEEE Computer Society of SLIIT
